6. Specific acquired competences

Professional competences	According to the specifics of each faculty.
Transversal competences	1. **Communication in the mother tongue** - the ability to express and interpret concepts, thoughts, feelings, facts and opinions, both orally and in writing (listening, speaking, reading and writing) and to interact linguistically in an appropriate and creative way in a complete series of cultural and social contexts; 2. **Communication in foreign languages** - which, in addition to the main dimensions of communication skills in the mother tongue, also involves the skills of mediation and intercultural understanding. The level of knowledge depends on several factors and the ability to listen, speak, read and write; 3. **Mathematical competences and basic skills in science and technology** - the ability to develop and apply mathematical thinking to solve different problems in everyday situations, with an emphasis on process, activity and knowledge. Basic competences in science and technology refer to the mastery, use and application of knowledge and methodologies to explain the world around. These involve an understanding of the changes caused by human activity and the responsibility of each individual as a citizen; 4. **Digital competences** - confident and critical use of information society technology (IST) and therefore basic skills about information and communication technology (ICT); 5. **"Learning to learn"** - the ability of man to pursue and organize his own learning, either individually or in groups, according to their own needs, as well as awareness of methods and opportunities; 6. **Social and civic competences** - personal, interpersonal and intercultural competences and all forms of behavior that allow each person to participate efficiently and constructively in social and professional life. These skills are related to personal and social well-being. It is essential to understand the codes of conduct and habits of the different environments in which people work. Civic competences, in particular knowledge of social and political concepts and structures (democracy, justice, equality, citizenship and civil rights), make possible the active and democratic participation of the people; 7. **Initiative spirit and entrepreneurship** - the ability to turn ideas into action. This sense involves creativity, innovation and risk-taking, as well as the ability to plan and manage projects to achieve goals. The person is aware of the context of his own activity and is able to capitalize on the opportunities that arise. This is the foundation to acquire more specialized skills and knowledge, which are needed by those who establish or contribute to a social or commercial activity. This should include raising awareness of ethical values and promoting good governance; 8. **Cultural awareness and expression** - appreciation of the importance of cultural expression of ideas, experiences and emotions through a series of ways (music, theater, literature and visual arts).

7. Course objectives (as resulting from the specific competences acquired)

7.1 General objective	• acquiring soft skills in non-formal and informal education contexts through voluntary involvement in activities within non-governmental organizations. • increasing employability by developing competences compatible with the labor market. • improving the quality of volunteer work or as a preliminary step to carrying out more complex volunteering activities.
7.2 Specific objectives	**1. Knowledge and understanding** (knowledge and proper use of discipline-specific notions) • Understanding the relevance of volunteer activity in the context of the profile of the studied specialization; • Highlighting the particularities of different non-governmental organizations in society as a whole; • Understanding the operation mode of public non-governmental organizations in Romania from the perspective of legal regulations in force.
	2. Explanation and interpretation (explanation and interpretation of ideas, projects, processes, as well as the theoretical and practical contents of the discipline) • Explaining the role of volunteer activities from the perspective of current relevance;

	• Interpretation of NGO activities from a critical and comparative perspective; • Critical reporting to life and its real problems following involvement in volunteer activities.
	3. Instrumental-applicative (design, management and evaluation of specific practical activities; use of some methods, techniques and tools for investigation and application) • Participation in concrete volunteering activities according to the activity profile of the NGO and their own interests; • Elaboration of a Volunteer Portfolio.
	4. Attitudinal (manifestation of a positive and responsible attitude towards the scientific field / cultivation of a scientific environment focused on democratic values and relations / promotion of a system of cultural, moral and civic values / optimal and creative capitalization of one's own potential in scientific activities / involvement in institutional development and in promoting scientific innovations / engaging in partnership with other persons-institutions with similar responsibilities / participating in one's own professional development) • Stimulating interest in volunteering, citizenship and social responsibility.
